

Key Stage: 5

Subject: Art, Craft and Design endorsement

Aims of the subject:

The aims of the course are to develop intellectual, imaginative and creative capabilities. Through aesthetic understanding, interest and enthusiasm students will learn how to develop and express their thoughts and ideas fluently through Art, Craft and Design.

Lessons will teach the skills required to develop individual ideas using a range of media, techniques and processes. We will use workshops to broaden knowledge and understanding and give our students the means to become confident, independent artists, crafts people and designers. We will focus on developing a wider knowledge and appreciation of the arts, inspiring a love and enthusiasm for the subject.

A Level Examination Board: AQA

Assessment Overview: Sept 2019 – April 2021

A level	Component 1 – Personal investigation	60% of total A level mark
	Component 2 – Externally set assignment	40% of total A level mark

<u>Course</u>	<u>What will I study?</u>	<u>Assessment</u>
A level	<p><u>Year 12</u></p> <p>September 2019 – April 2020</p> <p>The course will begin by exploring the theme 'my street'. Emphasis will initially be placed on the importance of drawing and experimentation. Students will be introduced to working with a wide range of materials and techniques, recording observations using an experimental approach in order to develop and broaden their knowledge and skills.</p>	<p>There will be a practice exam which will focus on the development of ideas in the Autumn term.</p>

Workshop sessions will introduce students to working with unfamiliar media and techniques.

Work is placed in context by studying and making art in the style of Artists and Designers who have been inspired by the same theme 'my street'. Other Artists and Designers who have experimented with relevant materials and techniques will also be studied.

Students will move on to develop their own ideas in response to the theme and finally produce individual pieces of practical work. The pieces could be produced in collage, mixed media, textiles, 3D forms, paintings, prints but should incorporate the skills developed in the initial stages of the course as well as being influenced by the work of relevant artists. Students will be encouraged to work to their individual strengths.

Year 12 - Component 1 Personal Investigation
April 2020 – September 2020

Students will choose, in collaboration with their teacher, a starting point for their personal investigation which will be based on an idea, issue, concept or theme. This will be supported by a written element of no less than 1000 words and no more than 3000 words.

Students will learn how to look at their chosen subject in depth, to use contextual materials to help expand their knowledge and develop a personal and creative response to their chosen topic. They will be guided to explore a range of materials and techniques that in turn will communicate their ideas creatively. Their teacher will advise and support them individually throughout the process.

Year 13

Component 1 continued – Personal Investigation – September 2020 – January 2021

Component 1 will conclude in January 2021. From September to January the students will continue to explore and develop their own ideas. This will lead them on to produce a personal, informed and meaningful practical response to their chosen theme for this component. All the work submitted for this personal investigation must address all the assessment objectives and is worth a possible 60% of the total A level marks

Component 2 – Externally set assignment.

The emphasis for this unit will be on the development of the student's own ideas. It will be structured in the same way as component 1 and will require all the assessment objectives to be addressed.

Students must select one of the starting points from the externally-set question paper. The externally-set assignment period will last from the beginning of February until April 2021. Students are required to produce preparatory work during this time and a finished piece or pieces at the end of the preparation period, in 15 hours of supervised time. All the work completed during this time including the preparatory work is submitted for assessment for component 2 and is worth a possible 40% of the total A level marks.

There will be a practice exam which will focus on the development of ideas for a personal response to the personal investigation in the Autumn term.

15 hours of unaided, supervised time at the end of component 2. During this time the students must produce a personal response to one of the externally set exam questions.

Enrichment opportunities

The students will be offered the opportunity to visit galleries and exhibitions if and when appropriate.
